Environmental Policy

Brovex is a mechanical engineering company which provides services in many forms of CNC machining, grinding, assembly and advanced measuring techniques. We recognize that all activities, products and services within our organization can cause impacts on the environment. We are therefore committed to minimizing and preventing the impact of our activities on the environment.

The key points of our strategy to achieve the policy are:

- Minimize waste by evaluating operations and ensuring they are as efficient as possible. This includes production, maintenance and repairs processes.
- Actively promote recycling both internally and amongst our customers and suppliers.
- Source and promote consumables that minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.
- Achieve continuous improvement through the development of environmental evaluation procedures.
- To construct a qualitative framework, which will enable us to review specific environmental areas and to achieve target goals.
